

Asbestos Notification

The Environmental Protection Agency (EPA) requires that each year, district workers and building occupants receive notification about asbestos activities such as response actions and inspections. The purpose of this correspondence is to meet those requirements and familiarize you with the asbestos related activities that have been conducted in the Public Schools of Petoskey during the last year.

MANAGEMENT PLANS

In 1988, The Public Schools of Petoskey contracted with DeLisle Associates, LTD, to conduct inspections for asbestos containing material (ACM) within all district owned buildings. These Management Plans are available for review in the administrative office of each building. A copy of each building management plan is also located in the Maintenance and Operations office.

SURVEILLANCE ACTIVITIES

The AHERA regulation requires surveillance of the condition of ACM every six months and Re-inspections every three years. The Three-Year Re-inspection within each of our buildings were conducted in April of 2020. The next Re-inspection will be conducted in April of 2023. The last periodic surveillance was conducted in June of 2021. All of these surveillance activities will be included as part of the building's Management Plans.

ASBESTOS ABATEMENT

During the past year there were two abatement projects in our district buildings. All documentation regarding past and future asbestos abatement projects are available for viewing; please contact the designated person at the Administration Office. Air tests will be conducted throughout all phases of future asbestos removal projects at each building. The air samples will be collected and analyzed in accordance with all regulatory agency requirements.
